## Heat Detection Workshops for Dairy Farmers

As we have looked at a variety of Fertility Focus Reports, it seems that heat detection has not been as good as it could have been on a number of farms. This contributes to decreased 6 week in-calf rates and increased final empty rates.

Bring your farm staff along to one of our upcoming heat detect workshops. Each session runs from **11am -12pm** and the cost is **\$50 per farm** (send as many staff as you like). We aim to cover some theory and some in paddock practical.

Our workshops are being held on local farms during **October 2011**

Area	October	Farm	Address	Supply #
Paretai	Tue 18 <sup>th</sup>	David & Bronwyn Bichan	110 Settlement Road	38116
Clinton	Wed 19 <sup>th</sup>	Steven & Rhonda Bamford	1624 Hillfoot Road	33908
